

STAR~PLUS FLEXKEY

FlexKey Cashier Screen Designed Specifically for Your Business!

The Star~Plus FlexKey is a simple, no-cost point of sale option included in the standard Star~Plus package. Using XML technology, the cashiers graphical user interface (GUI) can be designed and configured to meet your business needs. Some of the configuration options include: number of buttons, size, location, function, description, bitmaps, pictures, and wallpaper.

Register screens can be designed to deliver the form and function that best optimizes customer service and cashier performance. From hot keys to drill down menus, FlexKey is the most versatile cashier GUI available in retail today.

Improving customer service is a major benefit, but so are the labor savings in retail environments saddled with high employee turnover. Cashier screens designed specifically for your business means reduced training time, improved procedures, and fewer cashier errors.

Reduce Costs & Enhance Customer Experience

- Increase customer throughput and reduce customer wait times
- Reduce cashier training time and labor costs
- Reduce input errors at the POS
- Save precious counter space by using a touchscreen solution and eliminating keyboards
- Include your store logo, streaming video, or store advertising at the POS

Customize to Your Business Needs

- Fully configurable graphical user interface based on XML technology
- Touch screen, keyboard, touch-key combo, and NCR DynaKey compatible
- Use only the functions your business requires, eliminate all others
- Design drill down menus according to your product hierarchy
- Use company banner colors to enhance corporate image
- Completely configurable according to your retail segment and business work flow
- Change background / foreground colors that to best complement store lighting
- Change font style and size to maximize legibility and ease cashier eye fatigue
