

## STAR~PLUS INTEGRATED CREDIT, DEBIT & EBT

### Streamline Checkout Processes!

If you're a retailer, what's more fundamental than effective cash management? Core processes include knowing where the revenue originated, payment type, transfer mechanisms, authorization, reconciliation, and settlement. And that's just for credit, debit, and EBT transactions.

Star~Plus is designed around the simple premise of a fully integrated solution with data that is centrally managed and shared in a seamless manner. Integrated credit, debit, and EBT transactions are consolidated along with all other methods of payment to eliminate data redundancy and errors. Integrated tools meet retailer's important financial needs with comprehensive audit controls and a report builder to track key indicators.

### Streamline Checkout Processes

- Seamless POS processing
- Eliminate redundant data entry and errors
- Save on labor costs through increased productivity
- Improve customer service
- High speed IP and real-time transaction processing
- Fast deployment with ease of training
- Streamline checkout processes, resulting in faster customer throughput

### Ensure Accuracy & Security

- Faster, more efficient end-of-day balancing and settlements
- Enhance security controls
- Fully integrated from POS to back office
- Integrated tools for full audit controls and reporting functions
- Industry standards compliant for security and encryption
- Choice of multiple banks and processors
