

STAR~PLUS MULTI-STORE

Align Standards, Improve Performance!

For retailers with two to five stores, Star~Plus Multi-Store is a cost effective way of managing all of your locations from one central site. Multi-Store addresses the two principal factors in influencing where customers shop: product selection and customer service. Star~Plus Multi-Store allows different stores to share data including products on file, inventory quantities, and promotions. Through a simple lookup from any store, managers have the ability to locate and view stock in any location.

Easy to use, Multi-Store puts you in command of your inventory and merchandising. Buyers command 360-degree visibility of store inventories which reduces the carrying costs of having too much inventory, or the wrong inventory, and improves customer service.

Integrated Tools and Reports
